

## **Radiology Day at Sri Chamundeshwari Medical College, Hospital and Research Institute.**

On the occasion of International Radiology Day, IDOR-2024, the Department of Radio Diagnosis at SCMCH&RI organized a CME program for doctors, interns, and students on 8<sup>th</sup> November, 2024, from 2:00 p.m. to 3:00 p.m.

The objectives of the event were to:

- Celebrate the discovery of X-rays by German physicist Sir W.C. Roentgen.
- Highlight the importance and historical significance of this discovery.
- Update attendees on recent advancements in the field of radiology.

Dr. Nanjaraj C.P., HOD of Radio Diagnosis, welcomed the gathering and emphasized the importance of Radiology Day. Following the welcome address, the celebration continued with lighting of the lamp and a cake cutting ceremony, marking the occasion of Radiology Day.

The history and significance of the Radiology department were further discussed by Dr. Dinesh Kumar, Assistant Professor of Radio Diagnosis.

A highlight of the event was the presentation titled “Swar Sangeet of Brain and f-MRI” by Dr. Praveen G.U., Principal and Professor of Radio Diagnosis, and Dr. Anagha V. Pandit, Intern. This session explored the effects of music—spanning both the old and new eras—on the brain, as determined by various emotional responses measured through f-MRI (Functional MRI).

Tokens of appreciation in the form of gifts were presented to the Radiographers, followed by a vote of thanks from Dr. Shrunga Tejasvi, Assistant Professor of Radio Diagnosis.

Hats off to the Department of Radio Diagnosis for hosting the event successfully. We look forward to more such events that inspire and promote knowledge sharing in the future.
